PRESS RELEASE

FOR IMMEDIATE RELEASE

EFTS Teisko Airfield, a snowy airfield scenery for FSX/P3D released by a new developer, just in time for the winter season!

Tampere, December 19, 2014 – **Solipaste**, a new Finnish flight simulator developer, is very excited to announce the release of its first scenery product for FSX, Prepar3D v1.4, and Prepar3D v2.4 onwards. **EFTS Teisko Airfield** is a result of 14(!) months of meticulous modelling and texturing effort in order to create a beautiful yet accurate model of Teisko airfield, the adjacent motorsport center, and a large area the lovely Tampere countryside in Western Finland, a land of a thousand lakes. The scenery is available for download now from simMarket.com; more stores to be announced soon.

A scenery packed with 1.4 GB of details

The scenery covers more than 110 square km (over 40 sq mi) area around the airfield with 60 cm and 1.2 m resolution ground textures for four seasons and night, and thousands of accurately placed and custom textured autogen buildings. Included is also a extremely detailed 2.4 m elevation mesh with 30 cm elevation accuracy for a huge area of 240 sq km (over 90 sq mi).

As a unique feature you are able to choose between two alternative hard winter season: a realistic one with closed airfield and one with fully operational airfield. Regardless of the selected season, the amazingly beautiful rural landscape only 30 km north of the city center of Tampere, the most populous inland Nordic city, with hundreds of lakes, fields and forests will make not only Teisko and Tampere area but whole Southern and Western Finland a great place to fly!

About Solipaste

Solipaste is privately owned company founded in Tampere, Finland in 2012. EFTS Teisko Airfield is company's first product on flight simulation area. More information is available online at solipaste.com.
